# Brush & Lens

**Ujjwal Malik (um43)**

**Jasjiv Singh (js5324)**

**Zujun Yang (zy365)**

# Summary

- Brush & Lens is a platform that allows users to browse and purchase professional art and photographs.

- The primary audience for this system is new and experienced customers who are interested in buying or appreciating different types of art.

- Users can browse a catalog of curated works from different artists, like or share the content, and purchase the work in print or digital format.

# Storyboard

# Implementation (1/2) - Home, Gallery, Artwork

## System features and usefulness

- **Home**: Shows the trending picture of the week. User can buy the art with one-click.
- **Gallery**: Like a gallery studio, user can browse the artwork seamlessly with likes and post count.
- **Artwork**: User can browse the artwork of any artist.

## Frontend:

- Bootstrap 5
- Parallaxie, Isotope
- Javascript, jQuery, AJAX

## Backend:

- Django, sqlite

# Implementation (1/2) - Preview, About Us, Sign-Up/Login

## System features and usefulness
- **Preview**: User can select variety of material, border, and size. User can also toggle the Specifications, Delivery and Returns.
- **Login**: The portal greets the user, offers the user to login or sign-up.
- **Sign-up**: The portal asks minimum details to sign-up for the purchase.

## Frontend:
- Bootstrap 5
- Swiper, aos, isotope
- Javascript, jQuery, AJAX

## Backend:
- Django, sqlite
